As both of you were so instrumental in helping create <http://www.savethehives.com/>, I wanted thank you again for all your help over the years, and to let you know that I've just released a new iPhone/iPad app called **Honeybee Mapper**. It makes it even easier to help view honeybee hives in your area, and to help locate and map new honeybee hives. It even adds in a Honeybee Quiz (only 20 questions so far, but more coming soon). And with the next update, I will be adding in the ability of people to associate pictures of their hive locations and associate that with the map pointers when viewing the map. I hope you take the time to try out the app for your iPhone or iPad, and leave a review on the App Store. It is available here on the Apple app store: <http://itunes.apple.com/us/app/honeybee-mapper/id555854420?ls=1&mt=8>

This has been an even bigger learning experience than creating the website 4 years ago. Even following the same basic approach, I was able to add in some new features and cool functionality using the mobile devices. I hope this gets more bee keepers and citizen scientists engaged to help map hive locations. Also, if you have any ideas on getting this info into the hands of more researchers and scientists, or if you have input for future functionality, please let's start that conversation.

Thanks again,

Ronnie Bouchon
SaveTheHives

PS: Please feel free to forward this info out to your contacts and beekeeping associations!

Hi Ronnie,

I have been meaning to respond to you but I just started teaching and quickly became swamped. It is so good to hear from you. How exciting about the app. I will definitely get it on my iPhone. I would love to catch up sometime as it has been a while. I am some cool results to some of the research I was doing using colonies from the savethehives website and really I could not have done this research without your awesome brain and site!! Thank you. Is there a good time to chat? Let me know what works for your schedule.

Sincerely,

Debbie

Hi Debbie, so great to hear from you. I am open tomorrow 10-11, and 1-2 and then after 4pm, so let me know if any of those work for you for a quick catch up. If not, let me know what openings you generally have in your day, I'll try to find time later this week.

My cell number is 919-649-0446

Thanks,

Ronnie

Hi Ronnie,

Wow, this is totally fantastic! I've just purchased it, and I can't wait to try it out. I will also broadcast its availability much like I've done for the SaveTheHives website when interested individuals inquire. I can't thank you enough for learning how to do all of this! I'd love to pick your brain about how such apps could be used for my new BEES network.

Thanks again, and I'll be in touch! Sincerely, David

Hi Ronnie,

I am free this Thursday from 12-2 and also on Friday from 1-3. Will any of those times work for you?

Look forward to chatting.

Debbie

Ntt sure if I sent this, but Friday 2-3 is perfect. Let me know your number, and I'll call you.

Thanks

Ronnie

Hey Ronnie,

Unfortunately the week has been rainy here and I have to do field work this afternoon that I got rained out on yesterday. I could talk later from home if that works for you. The evenings always work pretty well. The number I gave you is my cell so if it works for you I will be home by 5:30 and on, or we can reschedule for next week.

Can't wait to talk and sorry about the last minute email.

Sincerely,

[Quoted text hidden]

No problem. Field work comes first. And I have the chigger bites to prove it! Will call later tonight and see if that works out

Ronnie

Dr. Tarpy, let me know more about your BEES network, and I'll try to setup a coffee meeting in the next couple of weeks. Would love to brainstorm again with you!

Ronnie

Also, if you've had a chance to use the [Honeybee Mapper app](#), would really appreciate a review of the app on the app store!

Debbie, sorry we didn't get a chance to talk last month; let me know how your schedule looks today between 2 and 4 or Friday between 12 and 2? Would love a quick chat to see how your research is going, and to get your impression of the [Honeybee Mapper App](#).

Thanks, Ronnie

Hi Ronnie,

I'd love to! I'm out of town right now but will be back next week before I take another trip. I have an explanatory video on my website if you want to check that out first and then let me know if you have any specific questions. Bee-school season will be starting to gear up, so I'm planning on having a BEES bee school this winter to help those who wish to participate as a virtual class.

I've been checking out your app and would love to chat about that too.

Talk to you soon! Sincerely, David
